Government Polytechnic, Nanded is established in 1964 with a primary aim to impart quality technical education and community allied services. The institute offers three year full time diploma programs in six disciplines of engineering and technology. It provides trained manpower to the industry and the higher education system.

**Vision**

To become a national level institute imparting value based technical education catering to needs of stakeholders with fully developed professionalism among the students

**About the workshop :** The training program will provide knowledge about advancements in the area of manufacturing and production processes related to CNC machines. It will impart skills necessary for working in modern manufacturing demands and environment. The participants will be familiarized with working principles and operations performed on CNC machining centers. The endeavor shall be to impart and hone hands-on skills on CNC machines tools.

*“Education is not the learning of facts, but training of the mind to think”*

*- Albert Einstein*

**Program outcomes:** The participants will be able to 1) Know different types of CNC machines 2) Apply the different codes used in CNC programming 3) Perform the Operation and control of different CNC machines and equipment 4) Adopt different toolings while working on various CNC machines 5) Experience in machining operations using different canned cycles 6) Develop skills in operations, simulation, controllers and part programming
